DOKLADY. MATHEMATICS

Volume 47, Number 1 July 1993

CONTENTS

M. L. Blank, *Singular effects in chaotic dynamical systems* 1
E. N. Devdariani and Yu. S. Ledyaev, *Optimality conditions for implicit control systems* 6
S. V. Znamenskiĭ and Yu. B. Zelinskiĭ, *When is the intersection of supports of an analytic functional a support?* 13
V. B. Larin, *Construction of a solution of the generalized Lyapunov equation* .. 17
T. I. Kiguradze, *On a boundary value problem for quasilinear hyperbolic systems* 21
A. A. Kosmodem'yanskiĭ, Jr., *On the computation of the normal derivative of the solution of the Dirichlet problem for the Poisson equation* 26
S. G. Merzlyakov, *On the closedness of the image of a difference operator* 29
V. I. Nazarov, *Controllability of systems with distributed parameters in scales of Banach spaces* 32
E. D. Rodionov, *Standard homogeneous Einstein manifolds* 37
V. I. Ryazanov, *On the convergence of characteristics, Fourier transforms, and the Reich-Walczak problem* 41
O. I. Tavgen', *Amalgams of linear groups and the Artin-Rees property* 45
K. K. Shchukin, *Irreducible abelian groups of automorphisms of an abelian group, and solvable primitive permutation groups* 50
Yu. Appel' [J. Appell] and E. M. Semenov, *The asymptotic behavior of the norms of truncates of functions in close function spaces* 54
V. I. Vlasov and A. V. Rachkov, *On weighted spaces of Hardy type* 57
A. A. Zhensykbaev, *Information-kernel splines in recovery problems* 62
I. V. Kremleva, *On a method of constructing asymptotic solutions of differential equations* 68
S. V. Rusakov, *A parametric difference spline scheme for problems of the dynamics of a viscous fluid* 73
V. T. Shevaldin, *Periodic interpolation splines and widths of classes of functions with bounded fractional derivative* 79
G. I. Shishkin, *Grid approximation of a singularly perturbed quasilinear equation in the presence of a transition layer* 83
G. M. Aĭrapetyan, *On the Hilbert problem in the sense of L^p-convergence, $p > 1$* 89
I. A. Blatov and V. V. Strygin, *On estimates best possible in order in the Galerkin finite-element method for singularly perturbed boundary value problems* .. 93

V. A. Gurvich, *Absolutely separated and biseparated graphs* 97
R. K. Seĭfullaev, *Boundary values of multidimensional integrals of potential type* 104
G. M. Aĭrapetyan, *A boundary value problem of Riemann-Hilbert type for n-holomorphic functions in the class* L^1 108
N. A. Vavilov, *Unipotent elements in subgroups of extended Chevalley groups containing a split maximal torus* 112
V. L. Volevich, *The Sinaĭ-Bowen-Ruelle measure for a multidimensional lattice of interacting hyperbolic mappings* 117
L. V. Zil'bergleĭt and V. V. Lychagin, *Spencer cohomology of invariant systems of differential equations on homogeneous spaces* 122
M. M. Ovezova, *On uniqueness of a regular solution of the Tricomi problem for a system of equations of mixed elliptic-hyperbolic type* 126
M. B. Sevryuk, *Invariant tori of reversible systems of intermediate dimensions* . 129
I. M. Gel'fand and M. I. Graev, *GG-functions* 134
V. N. Kolokol'tsov, *On the asymptotics of low eigenvalues and eigenfunctions of the Schrödinger operator* 139
F. G. Maksudov and B. P. Allakhverdiev, *On the spectral theory of nonselfadjoint second-order difference operators with matrix coefficients* 146
E. V. Radkevich, *On the Stefan heat wave* 150
A. I. Khisamutdinov, *Algorithms with fictitious collisions for Monte Carlo methods with continuous time for the Boltzmann equation* 156
A. S. Kholevo, *Structure of covariant dynamical semigroups* 161

Volume 47, Number 2 September 1993

CONTENTS

A. A. Vladimirov, V. S. Kozyakin, N. A. Kuznetsov, and A. Mandelbaum, *An investigation of the dynamic complementarity problem by methods of the theory of desynchronized systems* 169
F. G. Maksudov and B. P. Allakhverdiev, *Spectral analysis of nonselfadjoint operator-valued functions with continuous and point spectrum* 174
S. M. Nikol'skiĭ, *A class of functions with power growth at infinity* 179
A. S. Antipin, *Proximal differential systems with feedback control* 183
I. I. Bavrin and G. N. Bakunin, *On strong and weak ballisticity of functions* ... 187
Yu. M. Voloshin, *Up-down sequences and ordered trees* 192
Yu. V. Gavrilenko, *The structure of foundational congruences and the unification of infinite systems of equations in terms* 196
V. B. Larin, *On the computation of projections in the space* H_2 201
V. L. Makarov and V. V. Khlobystov, *Polynomial interpolation of operators in vector spaces* 205
A. S. Rapinchuk and V. V. Benyash-Krivets, *The geometric theory of representations for the fundamental groups of compact oriented surfaces* 211

V. N. Denisov, *On the structure of power asymptotics of a solution of the Cauchy problem for parabolic and hyperbolic equations* 216
E. G. D'yakonov, *Composite grids and asymptotically optimal algorithms for problems of Stokes and Navier-Stokes type* 221
I. V. Mel'nikova and S. V. Bochkareva, *C-semigroups and regularization of an ill-posed Cauchy problem* 228
G. A. Sviridyuk, *Semilinear equations of Sobolev type with relatively sectorial operator* 233
Chan Khy·u Bong [Tran Huu Bong], *On certain conditions for invertibility of c-continuous functional-differential operators* 239
A. A. Chikriĭ, *Minkowski functionals in pursuit theory* 243
A. Kh. Amirov, *A boundary value problem for a differential inequality* 249
V. N. Belykh, *On the problem of numerical solution of the Dirichlet problem by a harmonic single-layer potential (algorithms without saturation)* 252
V. D. Budaev, *On necessary conditions for systems of root functions of nonselfadjoint differential operators to form unconditional bases* 257
Yu. M. Voloshin, *Power series expansion coefficients of Ramanujan's continued fraction* 262
S. V. Gonchenko, D. V. Turaev, and L. P. Shil'nikov, *On the existence of Newhouse domains in a neighborhood of systems with a structurally unstable Poincaré homoclinic curve (the higher-dimensional case)* 268
V. S. Guliev, *Imbedding theorems for spaces of UMD-valued functions* 274
V. A. Gurvich, M. A. Temkin, V. M. Udalov, and A. V. Shapovalov, *Spanning graphs without odd holes and antiholes* 278
M. I. Kratko and A. N. Khruzin, *Unsolvability of certain problems in the theory of Rödding automata* 285
G. V. Sandrakov, *Averaging of quasiperiodic functions* 289
G. Fridman [H. I. Freedman] and A. A. Martynyuk, *On stability with respect to two measures in Kolmogorov's mathematical models of population dynamics* 294
U. G. Abdullaev, *On localization of unbounded solutions of the nonlinear heat equation with transfer* 298
V. D. Golovin, *On cohomologically finite sheaves* 302
V. M. Deundyak, I. B. Simonenko, and V. A. Stukopin, *Homotopy classification of families of Noetherian singular operators with piecewise continuous coefficients on a composite contour* 305
M. I. Imanaliev and S. N. Alekseenko, *On the theory of nonlinear equations with total derivative type of differential operator with respect to time* 310
V. V. Kravchenko and M. V. Shapiro, *On the generalized system of Cauchy-Riemann equations with a quaternion parameter* 315
V. A. Nogin and E. V. Sukhinin, *Inversion and characterization of hyperbolic potentials with densities in L_p* 320
U. Ë. Raĭtum, *The maximum principle and passage to convex hulls in optimal control problems* 324

G. E. Shikina, *Inequalities of Hilbert and Hausdorff-Young-Riesz type in the system of eigenfunctions and associated functions of a differential operator of even order* 329
V. N. Denisov, *On the asymptotics of solutions of elliptic equations* 333
V. V. Kurta, *On the behavior of solutions of a mixed initial-boundary value problem for the equation of non-Newtonian polytropic filtration* 338
V. S. Mel'nik, *On extremal problems for superposition functionals* 343
Ya. Sh. Salimov, *A sharp estimate for the sum of squares of the moduli of root functions for a nonselfadjoint extension of the Laplace operator* 348
I. V. Skrypnik, *The Hölder property of solutions of quasilinear parabolic equations of higher order* 353

Volume 47, Number 3 November 1993

CONTENTS

I. V. Atlasov, *Interpolation of linear transformers* 357
B. E. Batyrov and V. I. Burenkov, *On estimates of convolutions in Nikol'skiĭ-Besov spaces* 362
O. V. Viskov, *The addition formula for Hermite polynomials* 366
V. I. Danchenko, *On the rate of approach to the real axis of the poles of normalized logarithmic derivatives of polynomials* 371
M. M. Safarov, *A theorem on convergence to diffusion processes. Diffusion approximation of a queueing process in a network with a single server* 374
V. M. Sidel'nikov, *Decoding a Reed–Solomon code when the number of errors is greater than half its code distance* 378
V. E. Shemarulin, *The structure of the algebras of higher symmetries, and local equivalences of Euler-Darboux equations* 383
M. Shirinbekov, *On Liouville's theorem for plurisubharmonic functions* 389
G. I. Aslanov, *On the Neumann problem for second-order elliptic equations in an unbounded layer* 394
I. V. Bezmenov, *A new method for transferring the Sommerfeld radiation conditions to an artificial boundary of a domain, based on a variational principle* 399
V. I. Vlasov and A. B. Pal'tsev, *A method of solving the Dirichlet problem for domains with a narrow slit* 404
S. V. Gonchenko, D. V. Turaev, and L. P. Shil'nikov, *Dynamical phenomena in multidimensional systems with a structurally unstable homoclinic Poincaré curve* 410
Yu. A. Dubinskiĭ, *On the periodic problem for nonlinear "elliptic" equations with complex arguments* 416
N. A. Zhura, *A general boundary value problem for systems elliptic in the Douglis-Nirenberg sense in domains with piecewise smooth boundary* 421

M. A. Krasnosel'skiĭ, A. V. Lusnikov, and A. V. Pokrovskiĭ, *Stable fixed points of monotone operators* 427
V. N. Potapov, *Rapid lexicographic search* 431
A. I. Prilepko and I. A. Vasin, *The nonlinear inverse problem of determining a coefficient in the system of equations for the dynamics of a viscous incompressible fluid* 435
A. P. Soldatov, *A generalized Cauchy type integral and a singular integral in Hölder spaces with a weight* 440
L. A. Aĭzenberg and K. Rea [C. Rea], *A moment condition in the problem with a free boundary for CR-functions* 444
S. Kh. Aranson and E. V. Zhuzhoma, *Quasiminimal sets of foliations and one-dimensional basic sets of Axiom A diffeomorphisms of surfaces* 448
A. B. Bakushinskiĭ, *Iterative methods for solving nonlinear operator equations in the absence of regularity. A new approach* 451
K. Kh. Boĭmatov, *The generalized Dirichlet problem connected with a noncoercive bilinear form* 455
G. P. Egorychev and V. M. Levchuk, *Enumerative problems for groups and algebras of Lie type* 464
B. Yu. Sternin and V. E. Shatalov, *A ramified Cauchy problem for operators having Hamiltonian rest points* 468
A. I. Kheĭfits [Kheyfits], *The pointwise Fatou theorem for generalized harmonic functions* 474
A. Yu. Khrennikov, *p-adic statistical models* 477
Yu. E. Anikonov, *An estimate in a problem of integral geometry* 483
G. I. Arkhipov and V. N. Chubarikov, *On the number of terms in the Hilbert-Kamke problem in prime numbers* 485
K. Kh. Boĭmatov, *Coercive properties of strongly degenerate elliptic equations* . 489
G. Dzhangibekov, *On a class of two-dimensional singular integral operators and its applications to boundary value problems for elliptic systems of equations in the plane* 498
S. A. Iskhokov, *On the smoothness of a generalized solution of the Dirichlet variational problem for degenerate elliptic equations in a half-space* 504
V. A. Klyachin and V. M. Miklyukov, *On a capacity criterion for instability of minimal hypersurfaces* 509
M. A. Krasnosel'skiĭ, I. D. Maergoĭz [Mayergoyz], A. V. Pokrovskiĭ, and D. I. Rachinskiĭ, *Variable states of continuous relay systems* 513
A. V. Lakeev and S. I. Noskov, *A description of the set of solutions of a linear equation with interval defined operator and right-hand side* 518
V. K. Leont'ev, *Recognition of binary words from their fragments* 524
I. N. Sinitsyn, N. K. Moshchuk, and V. I. Shin, *Conditionally optimal filtering of processes in stochastic differential systems according to Bayesian criteria* 528
V. A. Smirnov, *Homology of A_∞-algebras* 534
M. M. Khapaev, *On taking measurement errors into account when they are treated mathematically by the Gauss least-squares method* 538

G. V. Chernikov, *The analytic Cauchy problem in spaces with evolution in multidimensional complex "time"* 540
K. Kh. Boĭmatov, *Spectral asymptotics of nonselfadjoint degenerate elliptic systems of differential operators* 545
V. V. Goryaĭnov, *Imbedding of iterations of probability generating functions into continuous semigroups* 554
R. V. Guseĭnov, *On inequalities of Hardy type and their applications in the theory of quasielliptic equations* 558
V. Ya. Gutlyanskiĭ and V. I. Ryazanov, *On quasicircles and asymptotically conformal curves* 563
S. A. Iskhokov, *The distribution of eigenvalues of some classes of nonselfadjoint elliptic systems of differential operators in unbounded domains* 567
V. I. Klimkin and M. G. Svistula, *Uniform boundedness of a family of weakly regular nonadditive set functions.* II 574
M. A. Krasnosel'skiĭ and D. I. Rachinskiĭ, *Normal states of vector relay systems* 577
L. V. Ovsyannikov, *On the property of x-autonomy* 581
G. I. Arkhipov, V. A. Sadovnichiĭ, and V. N. Chubarikov, *On the equivalence of two types of convergence with respect to a base of sets* 585
V. I. Burenkov and A. L. Gorbunov, *A two-sided estimate of the minimal norm of the extension operator for Sobolev spaces* 589
A. Yu. Zhirov, *Enumeration of hyperbolic attractors on orientable surfaces and applications to pseudo-Anosov homeomorphisms* 593
B. V. Loginov, L. R. Kim-Tyan, and Yu. B. Rusak, *Modification of the Lyapunov-Schmidt method and the stability of solutions of differential equations with a singular operator of finite index multiplying the derivative* 599
P. I. Plotnikov, *Equations with alternating direction of parabolicity and the hysteresis effect* 604
A. A. Samarskiĭ and A. V. Gulin, *Stability criteria for a family of difference schemes* 609
G. A. Sviridyuk and T. V. Apetova, *Phase spaces of linear dynamical equations of Sobolev type* 612
V. D. Stepanov and D. E. Edmunds, *On the measure of noncompactness and approximation numbers of a class of Volterra integral operators* 618
V. V. Filippov, *On change-of-variables families and a uniqueness theorem for ordinary differential equations* 624
S. V. Chistyakov, *The dynamical aspect of the solution of classical cooperative games* 629
